PROFESSIONAL SUMMARY

B.Tech student in Artificial Intelligence & Data Science with hands-on experience in building and analyzing real-world technical solutions. Proficient in data analysis, ETL pipeline development, machine learning, and dashboard development using Power BI and Tableau. Strong technical foundation in Python, SQL, and problem-solving with demonstrated expertise in business intelligence, data analytics, and AI/ML applications. Skilled at leveraging analytical thinking and programming capabilities to design efficient, scalable solutions that address complex business challenges and deliver measurable impact.

TECHNICAL SKILLS

Programming Languages: Python, Java

Databases & Data Management: SQL (MySQL), Data Warehousing, ETL Pipeline Development

Data Analysis & Business Intelligence: Power BI, Tableau, MS Excel (Pivot Tables), DAX, Data Visualization, Statistical Analysis

Machine Learning & AI: Deep Q-Networks (DQN), Multi-Agent Reinforcement Learning (MARL), OpenCV, Computer Vision

Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn, Simulation Modelling

EXPERIENCE

Data Analyst Intern | Axcentra | Chennai, India

Apr 2026 – May 2026

Designed and deployed interactive Power BI dashboards with dynamic filters, calculated fields (DAX formulas), and KPI tracking mechanisms to report key business metrics including sales performance, revenue trends, and category-wise business insights to senior stakeholders

Developed optimized SQL queries (JOINS, GROUP BY, aggregations, subqueries) and performed comprehensive end-to-end Python data wrangling and ETL processes using Pandas—including data cleaning, transformation, exploratory data analysis (EDA), and feature engineering—for customer and sales datasets

Built data visualizations with Matplotlib and Seaborn to identify patterns, trends, and statistical insights; created Excel Pivot Table dashboards for operational decision-making and business unit performance analysis

PROJECTS

AI-Driven Adaptive Traffic Signal Control System | Published Conference Paper

Python • Machine Learning (DQN, MARL) • Computer Vision (OpenCV) • System Design • SUMO Simulation

Engineered and optimized a Deep Q-Networks (DQN) + Multi-Agent Reinforcement Learning (MARL) system achieving 30% reduction in average vehicle delay for real-time adaptive traffic signal control, measured via Mean Vehicle Waiting Time (MVWT) KPI tracking and performance metrics

Architected end-to-end data pipeline processing heterogeneous IoT sensor data and computer vision inputs (OpenCV + SUMO simulation environment), achieving 25% improvement in traffic throughput through intelligent dynamic signal timing optimization and algorithmic enhancements

Designed multi-metric KPI dashboard covering critical business metrics: CO₂ emissions reduction, system throughput, and travel time optimization; reduced system latency by 15% through edge-based distributed processing architecture

Queue Efficiency Analysis Tool for Multi-Counter Service Systems | Solo Project

Python • Simulation Modelling • ETL • Data Analysis • Interactive Visualization (ipywidgets)

Built interactive ETL-style data pipeline with 3 configurable parameters (customer volume, service time, counter count) to model and analyze queue performance metrics across 0–100 customer scenarios, delivering accurate wait-time predictions and bottleneck identification

Applied threshold-based performance classification, data wrangling logic, and analytical techniques to identify operational bottlenecks; generated stakeholder-ready business reports with optimized resource allocation recommendations and actionable insights

EDUCATION

Panimalar Engineering College, Chennai

Bachelor of Technology (B.Tech) – Artificial Intelligence & Data Science

Expected Graduation: March 2027 | CGPA: 7.74 / 10.0

Published Research: "AI-Driven Adaptive Traffic Signal Control System" – 8th International Conference on Intelligent Computing, March 2025

CERTIFICATIONS & CREDENTIALS

SQL (Basic) Certification – HackerRank (Apr 2026 | ID: 0659AD940595)

Oracle Cloud Infrastructure – Generative AI Certified Professional – Oracle (Jun 2024)

Fundamentals of Visualization with Tableau – University of California, Davis (May 2024 | ID: 2BR6L77H32NJ)

Microsoft Azure AI Fundamentals: Computer Vision (AI-900) – Microsoft (Dec 2024)

Artificial Intelligence Foundation – Infosys (Jul 2024)

ACHIEVEMENTS & ACTIVITIES

2nd Prize – Queenathon 2026 (National Women-in-Tech Hackathon) | Dhaanish Ahmed Institute of Technology, Mar 2026

2nd Prize – Connections (Non-Technical Event) | Math Fest '24, SIMATS Engineering College, Sept 2024

3rd Prize – Mathematics Quiz | Math Fest '24, SIMATS Engineering College, Sept 2024

LANGUAGES

English • Telugu • Hindi • Tamil
